

RIDEMATE MOTORCYCLE INTERCOM

SIMPLE COMMUNICATION

Communicate in full duplex hands free, no static, no buttons, just simple, safe and fun communications.

MULTIPLE DEVICES

Share your music while riding. The Ridemate intercom will connect to all MP3, CD, and iPods and supply both helmets with audio. Need to speak? The system will recognize you're speaking, reduce the music audio by 50% and resume when you're finished.

DUAL POWER TYPE

Power the Ridemate using 3 AAA batteries or use the supplied cigarette lighter and connect it 12V to your bike.

- The Ridemate is the ultimate intercom system for motorcycle & snowmobile communications.
- The intercom mode is duplex, like a telephone, allowing simultaneous Rider-passenger conversations.
- Designed with a special amplifier to enhance sound quality under extreme motorcycle conditions
- Allows the connection of multiple devices such as cellular phone, GPS, iPod and 2 way radio.

The TORK RIDEMATE is a compact Rider to Passenger intercom that allows full duplex communication between the driver and the passenger. The system incorporates a high quality microphone and dual helmet speakers that enhances and optimizes audio quality while providing simple and effective communications for motorcycling.

The Ridemate offers the connection of multiple devices such as; cellular phone, 2 way radio, iPod and a GPS unit using a priority sequence. The Ridemate also has an integrated FM radio.

This motorcycle intercom system provides an answer for rider to passenger communication without delay, static and interference. The slim dual helmet speakers are simple and easy to use. Just Velcro directly into your helmet lining, no drilling or damaging of your helmet is required. Connect the noise reduction microphone to your helmet with the supplied two sided 3M tape.
